To Splunk Hiring team:

As an enthusiast of front-end developer, I was thrilled to see your posting for the position of full-time Software Engineer on Northwestern Career Fair. I am positive I can help with Splunk's upcoming challenges.

I created a website that collects projects of mine: <https://masheal.github.io/> to apply what I learned in Northwestern University. Programming tools such as HTML, CSS, JavaScript(Vue), bootstrap, jQuery, were used to realize different functions of those apps. "Great Spots to take photos", "Press Any Key", "To Do List", "Color Guessing Game" are some little apps I developed, you can follow the link above to have a look at them.

I hope to be able to speak with you in the near future concerning your needs in this position. Thank you for your time and consideration.

Sincerely,

Sheng Ma.
