To IBM Hiring team:

As a enthusiast of full stack development, I was thrilled to see your posting for the position of Software Engineer Intern on

http://www.1point3acres.com/bbs/forum.php?mod=viewthread&tid=426218&extra=page%3D1%26filter%3Dsortid%26sortid%3D192%26searchoption%5B3045%5D%5Bvalue%5D%3D2%26searchoption%5B3045%5D%5Btype%5D%3Dradio%26sortid%3D192. I am positive I can help with IBM's upcoming challenges.

I created a website that collects projects of mine: https://masheal.github.io/ to apply what I learned in Northwestern University. Programming tools such as HTML, CSS, JavaScript, bootstrap, jQuery, Express, Nodejs, MongoDB were used to realize different functions of those apps. "Great Spots to take photos", "Press Any Key", "To Do List", "Color Guessing Game" are some little apps I developed, you can follow the link above to have a look at them.

I hope to be able to speak with you in the near future concerning your needs in this position. Thank you for your time and consideration.

Sincerely,

Sheng Ma.
