Drawbridge
Director of Human Resources
San Mateo, CA

To Drawbridge hiring team:

I am a Master's student majoring in Computer Engineering, I received my Master's Degree from Northwestern University on December 15, 2018. My opt starts on Feb. 11. 2019, which means I am able to work immediately once I get the offer.

I have adequate knowledge of HTML, CSS, and React on the front end and Java, and Go on the back end. Because of the knowledge of these techniques, I am familiar with constructing an app. One of the apps, NearBy, is built using React and Go, which can be used to create and view posts near where users live. Users are able to share pictures and videos and view others' through Google Map. These functions are supported by the application of ElasticSearch, Google Dataflow, BigTable and BigQuery.

I believe I have a solid foundation of web skills and would do great at Drawbridge.

Sincerely yours,

Sheng Ma
